Who Will You Be In Contact With?

Design & Planning

Turnkey solutions assist in increasing delivery productivity while maintaining safety and reducing costs.

- Site Inspections – Scope of work briefing
- Conduct methodologies corresponding to your operations
- Site Specific TGS & TMPs
- RMS and Council approvals

Our Competitive Advantage

- At T&S, we understand your needs as a contractor.
- Through research and planning, T&S can provide expert knowledge based on regulations regarding your project.
- Communication between our teams, relaying job specifications to our teams on the road keeps your job site running smoothly.

Our Mission

- To be respected as an industry leader in safety education and work-zone management across the nation.
- To cultivate a team of leaders, providing opportunities for growth.

Our Fleet

At T&S, we prioritize fleet management, adherence to regulations and assuring the correct tools for your projects.

- Real time location tracking.
- Fleet quality management.
- Providing driver management.

Our Systems

T&S Projects

T&S Traffic Control has successfully delivered traffic control and management solutions across a wide range of environments, including:

- Night works in high-traffic urban zones
- Complex intersection closures requiring multi-phase staging
- Mobile traffic control setups for utility and telecommunications works
- Emergency response deployments with rapid mobilisation
- Regional and metro arterial road projects, including highway shoulder works

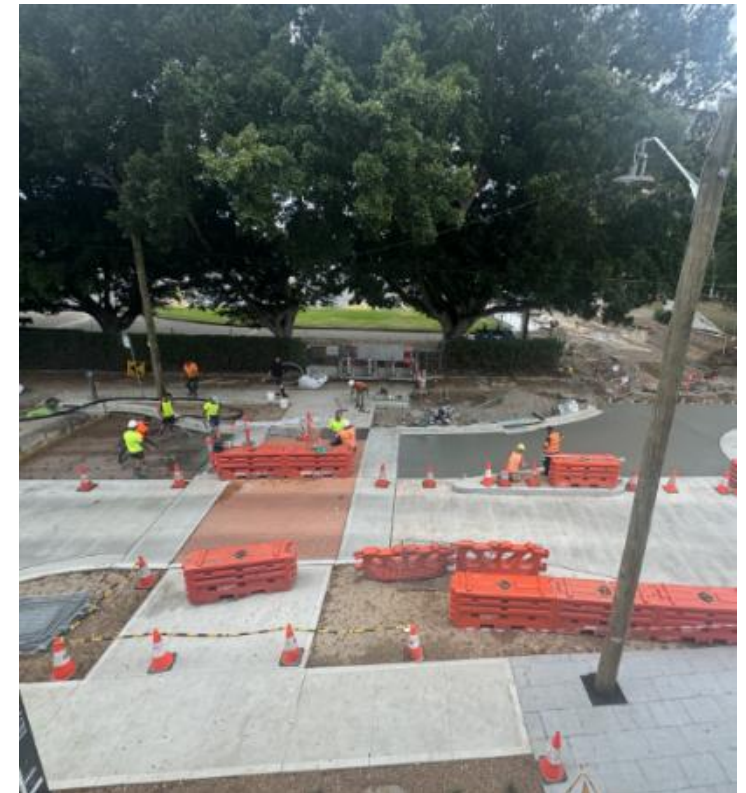

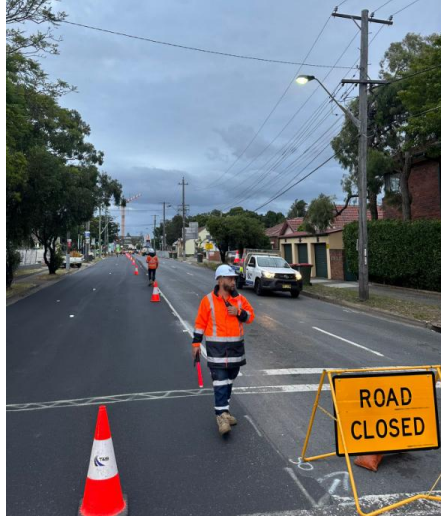

Rerouting Pedestrians & Exclusion Zones

Civil Infrastructure

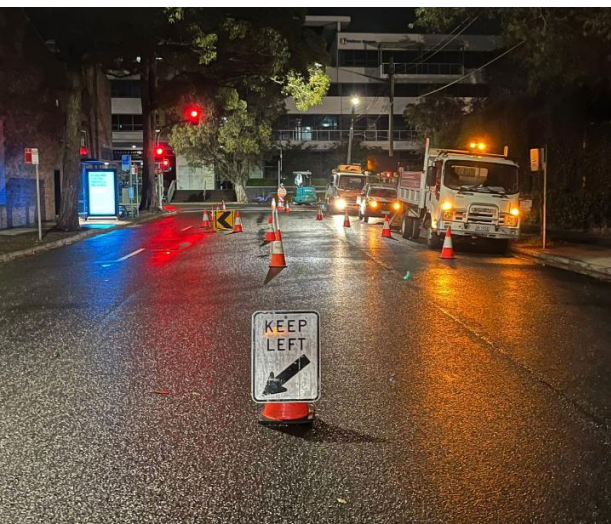

Asphalt Upgrades

T&S Traffic Control is a trusted partner in the delivery of asphalt resurfacing and road upgrade programs across New South Wales. Our crews provide full-service traffic control for:

- Asphalt mill & fill operations
- Night works and shoulder closures
- Road closures and detours
- Mobile lane shifts and convoy escorts
- We work closely with asphalt contractors and local councils to ensure every site is managed safely, efficiently, and in full compliance with **TfNSW**, **AS1742.3**, and **AGTTM** standards.

Plumbing & Stormwater

Crane Lifts & Erections

T&S Traffic Control provides end-to-end traffic control solutions for mobile crane operations, including tower crane erections, structural lifts, and plant deliveries in high-risk urban environments.

We coordinate with lift supervisors, local councils, and RMS to manage:

- Full and partial road closures
- Pedestrian detours and site shielding
- Oversize vehicle guidance
- Night and weekend lift traffic setups
- Permit support and VMS notifications
